

**Out of the Blue: Introducing the OMNIS-DUO portable all-in-one DJ system –  
The perfect setup for throwing DJ parties anytime, anywhere, features battery power and multiple audio  
input and output options including Bluetooth<sup>®/MD</sup> connectivity**

**Out of the Blue: Introducing the OMNIS-DUO portable all-in-one DJ system**

- **Perfect setup for throwing DJ parties anytime, anywhere**
- **Battery power, plus multiple audio input and output options for total flexibility**
- **Also includes Bluetooth<sup>®/MD</sup> connectivity**

**January 25, 2024:** AlphaTheta Corporation announced the new AlphaTheta brand, leveraging the experience we've built under the Pioneer DJ brand. As we begin this journey, we're releasing the OMNIS-DUO, the perfect portable setup for throwing DJ parties with your friends anytime, anywhere.

Grab your DJ setup, gather your friends, find a place to hang out, and get the party started with the OMNIS-DUO. Built to be totally portable, the all-in-one DJ system is lightweight and compact enough to fit in a good-sized backpack. It's easy to set up and enjoy an authentic DJ experience in any location – even outside – thanks to the **Bluetooth<sup>®/MD</sup>** audio output function, battery power, 2-deck + mixer interface, and touchscreen. There's no need to take your laptop or cables – whether you want to party at the beach, in a park, or even in a vehicle, there's no limit.

When you're ready for some audience interaction, you can get the crowd involved with the OMNIS-DUO, which features a Bluetooth audio input function so anyone can bring their phone and play their favorite track. All the unit's effects can be applied to the Bluetooth audio and there's a choice of other input options. This all-in-one DJ system really lets you open the party to everyone and create unity through music. Its design adopts a distinctive indigo color, inspired by the versatility of denim jeans, so it looks at home in professional venues and casual environments.

Since the introduction of the CDJ-500 in 1994, we've been making products with cutting-edge technology to help DJs excel. And as we look to the future, the AlphaTheta brand is committed to growing with the community of people who are connected by a passion for music and its culture.

## PRODUCT OVERVIEW

Product category	: Portable all-in-one DJ system
Model name	: OMNIS-DUO
SRP	: €1,599 including VAT / £1,369 including VAT/ \$1,499 excluding tax
In-store date	: Out now

## KEY FEATURES

### **Portability and playability: Turn any location into a party venue instantly**

Easily slide the OMNIS-DUO into a good-sized backpack and carry it anywhere thanks to the compact size, modest weight, and rounded corners of the unit. The system's 2-deck + mixer layout will look familiar to everyone and feel great when you're DJing. And there are 2 modes for the touchscreen – Light and Dark – which you can instantly switch between so you'll always be able to see the displayed information, even in bright outdoor settings.

### **Built-in battery means no power supply needed and less gear to transport**

Play for up to 5 hours without plugging into the mains. When it's time to top up the power, you can connect the AC adapter or plug in a compatible power bank (45W or more) to the dedicated USB Type-C terminal. Need to keep the music going? Switching to Eco mode extends the life of the battery and the party. And if you combine the OMNIS-DUO with the new battery-powered WAVE-EIGHT speaker, which features ultra-low-latency SonicLink technology, you can enjoy wireless DJing for total freedom.

### **Flexible audio output options to play anywhere – there's no limit**

As the first-ever all-in-one DJ system to feature a Bluetooth audio output function, the OMNIS-DUO opens up brand-new possibilities. Whether you want to play on a campground, at the beach, or even connect to the sound system in a vehicle, there's no limit to the places you can hold a party. And when the time comes to play in a venue like a bar, you can use the professional XLR output, while the RCA terminals are perfect for plugging in monitor speakers at home.

### **Bluetooth audio input enables the crowd to join in your set**

Never disappoint a friend again when they request a song. Instead, invite them to connect their phone to the OMNIS-DUO via the Bluetooth input function and you can drop the track into your set. Thanks to the system's industry-first Bluetooth Playback function, you'll have control of the audio on the deck. So, you can adjust the volume and EQ, apply effects to the sound, change the tempo, use Hot Cues, and scratch – just like you would with tracks prepared in advance and played from other music sources. With the OMNIS-DUO and Bluetooth audio input, you can enjoy collaborating with friends and expand your musical experiences.

### **Support for multiple music sources to suit your DJ style**

Play your music from almost any source. USB Type-A drives and SD cards can be plugged straight into the OMNIS-DUO, as well as a PC/Mac via the USB Type-C terminal if you want to use rekordbox Performance mode. The Wi-Fi® function means easy access to tracks on a PC/Mac, smartphone, or the cloud without a wired connection\*.

Support for Serato DJ Lite is coming this summer too.

\*Available with Link Export and the CloudDirectPlay feature in rekordbox for Mac/Windows or rekordbox for iOS/Android.

**Brand-new design that looks great in any environment**

The OMNIS-DUO looks at home everywhere you take it – from professional events to spontaneous outdoor parties. Its new indigo color is inspired by denim jeans, a classic and hugely versatile fashion item, and the unique curves of the unit create a sleek silhouette. The printing on the top plate is minimal too, helping to create a sophisticated look. It is designed to be both casual and fun to use that makes you want to take it with you to any place.

**Other features**

- 8 types of Beat FX
- 6 types of Sound Color FX
- 8 Hot Cues per deck
- Dedicated Beat Jump buttons
- Dedicated Beat Loop controls
- 2 Mic inputs
- Booth output (combined with master RCA)
